Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

1.1580 inches

Teeth Quantity:

9

Outside Diameter:

1.4688 inches

Nominallength:

3.750 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

14.5000 degrees

Helix Angle:

39.0000 degrees

Distance Between Body Face And Protruding Hub End:

1.500 inches first end

Face Width:

1.875 inches

Hub Diameter:

0.875 inches second end

Mounting Hole Diameter:

0.188 inches transversely through hub, first end

Style Designator:

Protruding hubs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
