Body Style:

Webbed, offset, with lightening holes

Pitch Diameter:

1.4062 inches

Teeth Quantity:

45

Nominallength:

0.562 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.313 inches first end

Face Width:

0.250 inches

Hub Diameter:

0.500 inches first end

Precision Classification:

Quality number 10 or quality number 11

Material:

Steel comp 303

Material Specification:

Qq-s-763, class 303, cond a federal specification single material response

Style Designator:

One protruding hub, one flush hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
