Spur Gear - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3020-00-256-2222

Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

2.2180 inches

Teeth Quantity:

71

Nominallength:

0.380 inches

Tooth Form:

Standard

Pressure Angle:

14.5000 degrees

Distance Between Body Face And Protruding Hub End:

0.260 inches first end

Face Width:

0.120 inches

Bore Diameter:

0.313 inches both ends

Hub Diameter:

0.560 inches first end

Material:

Steel comp 1117

Material Specification:

66 federal standard single material response and aisi/sae 1117 assn standard single material response

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

```
--
```

Demilitarization:

No

Fiig:

A27300
