Body Style:

Webbed, offset, solid

Spline Quantity:

12 both ends

Pitch Diameter:

Between 0.7625 inches and 0.7750 inches

Teeth Quantity:

40

Bore Style:

Straight spline both ends

Outside Diameter:

0.8725 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

20.0000 degrees

Helix Angle:

8.1332 degrees

Distance Between Body Face And Protruding Hub End:

0.125 inches first end

Face Width:

0.287 inches

Bore Diameter:

0.2105 inches first end

Hub Style Designator:

Plain first end

Hub Diameter:

0.355 inches first end

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
