Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

4.6875 inches

Teeth Quantity:

95

Bore Style:

Plain both ends

Mounting Hole Type And Quantity:

3 counterbored axially through hub, first end

Outside Diameter:

4.813 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.375 inches first end

Face Width:

0.250 inches

Bore Diameter:

1.750 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

4.000 inches first end

Mounting Hole Diameter:

0.188 inches axially through hub, first end

Bolt Hole Circle Diameter:

3.000 inches axially through hub, first end

Material:

Stainless steel

Surface Treatment:

Passivate

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
