#### **Body Style:**

Plain, solid

## **Attachment Method:**

Clamp

## Pitch Diameter:

1.0937 inches

# **Teeth Quantity:**

70

## **Outside Diameter:**

1.124 inches

Tooth Form:

Standard

#### **Pressure Angle:**

20.0000 degrees

## Distance Between Body Face And Protruding Hub End:

0.281 inches first end

## Face Width:

0.093 inches

## Bore Diameter:

0.250 inches both ends

## **Precision Classification:**

Quality number 10 or quality number 11

## Material:

Aluminum alloy 2024

## **Material Specification:**

Qq-a-225/6, t4 federal specification single material response

## Surface Treatment:

Anodize

# Surface Treatment Specification:

Mil-a-8625, type 2 military specification single treatment response

# Style Designator:

Protruding hub

# Shelf Life:

N/a

# Unit Of Measure:

--

## Demilitarization:

No

Fiig:

A27300

## Mil-std (military Standard):

Mil-a-8625 spec.
