Body Style:

Plain, with lightening holes

Pitch Diameter:

2.5938 inches

Teeth Quantity:

80

Outside Diameter:

2.7500 inches

Nominallength:

0.375 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

14.5000 degrees

Helix Angle:

23.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.281 inches first end

Face Width:

0.094 inches

Bore Diameter:

0.3438 inches both ends

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
