Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

2.9500 inches

Teeth Quantity:

59

Nominallength:

1.312 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.313 inches first end

Face Width:

1.000 inches

Bore Diameter:

1.313 inches both ends

Precision Classification:

Quality number 5 or quality number 6

Material:

Steel

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
