Body Style:

Plain, solid

Attachment Method:

Clamp

Pitch Diameter:

Between 0.9057 inches and 0.9067 inches

Teeth Quantity:

87

Nominallength:

0.421 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.296 inches first end

Face Width:

0.125 inches

Bore Diameter:

0.187 inches both ends

Hub Diameter:

0.249 inches first end

Clamping Surface Length:

0.265 inches first end

Precision Classification:

Quality number 12

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
