Body Style:

Plain, solid

Spline Quantity:

11 first end

Pitch Diameter:

0.5833 inches

Teeth Quantity:

56

Outside Diameter:

0.604 inches

Nominallength:

0.656 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.531 inches first end

Face Width:

0.125 inches

Special Features:

Externally splined hub first end; 11 splines+ 0.125 minor dia; 0.177 major dia; 0.218 lg

Material:

Plastic phenolic body

Surface Treatment:

Anodize hub

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A27300
