Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

8.1875 inches

Teeth Quantity:

78

Bore Style:

Plain both ends

Mounting Hole Thread Series Designator:

Unf axially through hub, first end

Mounting Hole Thread Size:

0.375 inches axially through hub, first end

Mounting Hole Type And Quantity:

8 threaded axially through hub, first end

Outside Diameter:

8.5000 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

20.0000 degrees

Helix Angle:

45.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.250 inches first end

Body Recess Depth:

0.688 inches second end

Face Width:

1.188 inches

Bore Diameter:

4.6720 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

6.500 inches first end

Mounting Hole Diameter:

0.328 inches axially through hub, first end

Bolt Hole Circle Diameter:

5.625 inches axially through hub, first end

Material:

Steel

Surface Treatment:

Cadmium

Style Designator:

Protruding hub, recessed body

Furnished Items And Quantity:

2 externally lubricated bearing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
