Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

5.9375 inches

Teeth Quantity:

285

Bore Style:

Plain both ends

Mounting Hole Thread Series Designator:

Unc axially through body, first end

Mounting Hole Thread Size:

0.138 inches axially through body, first end

Mounting Hole Type And Quantity:

6 threaded axially through body, first end

Outside Diameter:

5.976 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.500 inches first end

Face Width:

0.250 inches

Bore Diameter:

5.976 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

5.750 inches first end

Material:

Aluminum alloy 6061

Material Specification:

Qq-a-250/11, t6 federal specification single material response

Surface Treatment:

Anodize

Surface Treatment Specification:

Mil-a-8625, type 2, class 1 military specification single treatment response

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300

Mil-std (military Standard):

Mil-a-8625 spec.
