Attachment Method:

Clamp

Teeth Quantity:

130

Bore Style:

Plain first end

Outside Diameter:

1.830 inches

Tooth Form:

Standard

Distance Between Body Face And Protruding Hub End:

0.203 inches first end

Face Width:

0.250 inches

Bore Diameter:

0.187 inches both ends

Hub Style Designator:

Plain first end

Material:

Aluminum alloy 6061

Material Specification:

Qq-a-225/8, t6 federal specification single material response

Surface Treatment:

Anodize

Surface Treatment Specification:

Mil-a-8625, type 2 military specification single treatment response

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300

Mil-std (military Standard):

Mil-a-8625 spec.
