Attachment Method:

Attachment Method:
Mounting hole
Bore Style:
Plain both ends
Design Type:
Spur second gear
Construction:
Solid
Thread Size:
0.099 inches both ends
Outside Diameter:
2.4687 inches second gear
Bore Diameter:
0.625 inches both ends
Precision Classification:
Quality number 12 first gear
Special Features:
Flange with mounting holes located on first end
Material:
Aluminum alloy 6061
Material Specification:
Qq-a-225/8, t6 federal specification single material response
Surface Treatment:
Anodize
Surface Treatment Specification:
Mil-a-8625, type 1 military specification single treatment response
Thread Series Designator:
Unc both ends
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A270a0
Mil-std (military Standard):

Mil-a-8625 spec.
