Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

3.0000 inches

Teeth Quantity:

96

Bore Style:

Plain both ends

Mounting Hole Thread Series Designator:

Unc axially through hub, first end

Mounting Hole Thread Size:

0.138 inches axially through hub, first end

Mounting Hole Type And Quantity:

1 threaded axially through hub, first end

Outside Diameter:

3.062 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.250 inches first end

Face Width:

0.125 inches

Bore Diameter:

0.562 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

0.875 inches first end

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
