Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

1.5000 inches

Teeth Quantity:

96

Bore Style:

Plain both ends

Mounting Hole Thread Series Designator:

Unc axially through hub, first end

Mounting Hole Thread Size:

0.112 inches axially through hub, first end

Mounting Hole Type And Quantity:

1 threaded axially through hub, first end

Outside Diameter:

1.531 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.218 inches first end

Face Width:

0.125 inches

Bore Diameter:

0.187 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

0.375 inches first end

Material:

Aluminum alloy

Surface Treatment:

Anodize

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
