Body Style:
Plain, solid
Attachment Method:
Mounting hole
Pitch Diameter:
1.5000 inches
Teeth Quantity:
96
Bore Style:
Plain both ends
Mounting Hole Thread Series Designator:
Unc axially through hub, first end
Mounting Hole Thread Size:
0.112 inches axially through hub, first end
Mounting Hole Type And Quantity:
1 threaded axially through hub, first end
Outside Diameter:
1.531 inches
Tooth Form:
Standard
Pressure Angle:
20.0000 degrees
Distance Between Body Face And Protruding Hub End:
0.218 inches first end
Face Width:
0.125 inches
Bore Diameter:
0.187 inches both ends
Hub Style Designator:
Plain first end
Hub Diameter:
0.375 inches first end
Material:
Aluminum alloy
Surface Treatment:
Anodize
Style Designator:
Protruding hub
Shelf Life:
N/a
Unit Of Measure:

--
