Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

1.1875 inches

Teeth Quantity:

114

Nominallength:

0.370 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Face Width:

0.125 inches

Bore Diameter:

0.187 inches both ends

Precision Classification:

Quality number 12

Mounting Hole Diameter:

0.157 inches transversely through hub, first end

Surface Treatment:

Anodize

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
