Bore Style:

Plain both ends

Design Type:

Spur second gear

Construction:

Assembled

Outside Diameter:

0.415 inches second gear

Nominallength:

0.189 inches

Bore Diameter:

0.188 inches both ends

Precision Classification:

Quality number 8 all gears

Material:

Copper alloy 360 second gear

Material Specification:

Qq-b-626, comp 22 federal specification single material response second gear

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A270a0
