Pitch Diameter:

0.2813 inches

Teeth Quantity:

18

Outside Diameter:

0.3125 inches

Tooth Form:

Special

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.525 inches second end

Face Width:

2.235 inches

Special Features:

Includes bushing on each end and 0.062 in diameter hole in one end

Material:

Stainless steel

Material Specification:

Ams5659 cond a assn standard single material response

Style Designator:

Protruding hubs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A27300
