Body Style:

Plain, solid

Teeth Quantity:

40

Bore Style:

Plain both ends

Nominallength:

0.250 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.156 inches first end

Face Width:

0.094 inches

Bore Diameter:

0.124 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

0.312 inches first end

Precision Classification:

Quality number 10 or quality number 11

Material:

Plastic

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
