Pitch Diameter:

0.3200 inches

Teeth Quantity:

28

Outside Diameter:

0.937 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.250 inches between body and flange

Face Width:

0.250 inches

Special Features:

Bore has a keyway 90 degrees to first space

Material:

Plastic acetal

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
