Attachment Method:

Clamp

Pitch Diameter:

1.9531 inches

Teeth Quantity:

125

Outside Diameter:

1.9844 inches

Nominallength:

0.120 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

0.281 inches first end

Face Width:

0.104 inches

Special Features:

Change bore size from 0.2498 inches to 0.2405 inches

Surface Treatment:

Passivate

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
