End Application:

Los angeles class ssn (688)

Bore Style:

Plain both ends

Design Type:

Spur all gears

Construction:

Assembled

Outside Diameter:

2.165 inches second gear

Nominallength:

2.125 inches

Bore Diameter:

1.254 inches both ends

Special Features:

Six 1.250 in. Diameter lightening holes evenly spaced

Material:

Copper alloy

Material Specification:

Qq-c-390 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A270a0
