End Application:

Seawolf class ssn

Pitch Diameter:

11.000 inches

Teeth Type:

Spur

Pressure Angle:

20.0000 degrees

Face Width:

1.000 inches

Err Default:

Err default

Special Features:

Second gear has 20 teeth in 360 degrees, 20 degrees pressure angle, 0.875 in. Face width, and 5.000in. Pitch dia

Material:

Nickel alloy

Material Specification:

Qq-n-288, comp b, cond as federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A270a0
