Body Style:

Plain, solid

End Application:

Wasp class lhd

Pitch Diameter:

3.0000 inches

Teeth Quantity:

30

Face Type:

Concave

Bore Style:

Plain both ends

Outside Diameter:

3.200 inches

Tooth Direction:

Right

Throat Radius:

0.3120 inches

Pressure Angle:

14.5000 degrees

Helix Angle:

4.5666 degrees

Distance Between Body Face And Protruding Hub End:

0.625 inches first end

Face Width:

0.625 inches

Bore Diameter:

0.875 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

1.750 inches first end

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
