End Application:

Seawolf class ssn

Teeth Quantity:

14

Face Type:

Concave

Bore Style:

Plain both ends

Tooth Direction:

Left

Mating Thread Lead Quantity:

1

Pressure Angle:

14.5000 degrees

Helix Angle:

6.3600 degrees

Face Width:

0.876 inches

Bore Diameter:

1.536 inches both ends

Special Features:

Egg-shaped style with lightening hole. Part of lower hatch

Material:

Nickel alloy

Material Specification:

Ams5662, cond hf assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
