End Application:

Seawolf class ssn

Teeth Quantity:

10

Pitch Radius:

67.50 millimeters

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

65.00 millimeters first end

Face Width:

35.00 millimeters

Outside Radius:

71.50 millimeters

Product Name:

Sector gear

Special Features:

Dpart of module mast. Whole gear would include 27 teeth. Actual gear has 10 teeth. length 100.00 millimeters. Gear is a reverse image of nsn 3020-01-483-5908 teeth on top instead of bottom.

Material:

Nickel alloy 718

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
