Bore Style:

Plain both ends

Teeth Type:

Spur

Pressure Angle:

20.0000 degrees

Bore Diameter:

1.438 inches both ends

Product Name:

Pinion, locking

Special Features:

First sector has 9 actual teeth; second sector has 29 actual teeth.

Material:

Nickel alloy

Material Specification:

Qq-n-288-cmpsn, cond-as cast federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
