Storage Temperature Range:

-65.0/+160.0 degrees fahrenheit

End Application:

Airborne warning and control system

Accessory Components And Quantity:

Tube head carrying case 1; control cable - 100 ft w/strain relief 1; cooler cable - 50 ft. W/strain relief 1; power cable - 50 ft. 1; operation manual 1; key for control unit safety lock 1

Special Features:

X-ray tube head, high frequency constant potential, end grounded anode, metal ceramic tube, air cooled directional; dc cooling fan/heat sink; tube head length 29.75 in; tube head dia. 7.0 in; input voltage 100-130/200-260 volts ac; 50/60 hz, 20 amps ; beam angle 40 degrees x 60 degrees directional

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
