Body Style:

Plain, with lightening holes

End Application:

2520-01-626-5061

Product Name:

Gear, output ring

Special Features:

Gear has (2) sets of teeth, (1) internal and (1) external. The external set has (39) teeth with a pressure angle of 25 degrees. The internal set has (77) teeth with a pressure angle of 20 degrees. Has (8) equally spaced .365 - .385 inch diameter holes.

Material:

Steel comp 4320 or steel comp 4320h or steel comp 4820 or steel comp 4820h or steel comp 8620 or steel comp 8620h

Material Specification:

Astm a304 assn standard all material responses or astm a322 assn standard all material responses or astm a108 assn standard all material responses

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
