**Environmental Protection:**

Abrasion resistant and heat resistant and oil resistant

**Strengthening Feature:**

Nylon cord

**Performance Type:**

Standard capacity

**Width:**

0.062 inches

**Pitch Length:**

20.0 inches

**Drive Type And Quantity:**

100 teeth

**Product Name:**

Standard timing belt

**Special Features:**

Fiberglass tension members, chloroprene body with nylon covered teeth, all bonded together for strength; fiberglass tensile cord: high dimensional stability; chloroprene belt body: oil, heat and ozone resistance; high tooth shear resistance; nylon tooth cover: durability and wear resistance, increased power capacity

**Material:**

Rubber chloroprene class cr body

**Style Designator:**

Positive drive

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A228b0
