Environmental Protection:

Abrasion resistant and heat resistant and oil resistant

Strengthening Feature:

Nylon cord

Performance Type:

Standard capacity

Width:

0.062 inches

Pitch Length:

20.0 inches

Drive Type And Quantity:

100 teeth

Product Name:

Standard timing belt

Special Features:

Fiberglass tension members, chloroprene body with nylon covered teeth, all bonded together for strength; fiberglass tensile cord: high dimensional stability; chloroprene belt body: oil, heat and ozone resistance; high tooth shear resistance; nylon tooth cover: durability and wear resistance, increased power capacity

Material:

Rubber chloroprene class cr body

Style Designator:

Positive drive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A228b0
