Overall Length:

1.920 inches

Body Width:

0.920 inches

Body Thickness:

0.327 inches

End Application:

Aircraft f-4 & f-5, next higher assembly-outer wing slat mechanism

Link Style:

Straight

Body Construction:

Solid

Special Features:

0connecting hole bearing location both ends, end radius 0.460 in , end attachment not included, distance from end to hole center 0.460 in , hole diameter 0.625 in , effective length 1.000 in , locknut not included

Material:

Aluminum alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A52410
