Fabrication Method:

Molded

Width:

1.250 inches

Thickness:

0.188 inches

Hole Arrangement Style:

Single

Lining Style:

Segment plain

Arc Length:

2.562 inches

Minor Radius:

4.781 inches

Application Type:

Dry

Hole Type And Quantity:

2 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side ground

Attachment Method:

Riveted

Special Features:

Counterbore on inner arc

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 71871 have indicated thier part number contained asbestos prior to 8 4. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A230a0
