Fabrication Method:

Compressed

Width:

5.000 inches

Thickness:

0.250 inches

Hole Arrangement Style:

Double even

Strengthening Feature:

Interwoven wire

Friction Lining Material:

Asbestos composition

Lining Style:

Segment plain

Arc Length:

11.719 inches

Minor Radius:

6.500 inches

Application Type:

Dry

Hole Type And Quantity:

10 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side unground

Attachment Method:

Riveted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A230a0
