Fabrication Method:

Compressed

Major Diameter:

7.000 inches

Thickness:

0.188 inches

Hole Arrangement Style:

Staggered

Mounting Hole Diameter:

0.125 inches

Strengthening Feature:

Internally molded-in reinforcement

Minor Diameter:

3.125 inches

Lining Style:

Clutch disk

Hole Type And Quantity:

12 countersunk

Mounting Hole Circle Diameter:

6.000 inches and 4.000 inches

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side ground

Circular Pattern Hole Type And Quantity:

8 countersunk outer securing circle

Attachment Method:

Riveted

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 08219 have indicated thier part number contained asbestos prior to 8 4. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
