Fabrication Method:

Molded

Width:

3.000 inches

Thickness:

Between 0.302 inches and 0.322 inches

Hole Arrangement Style:

Double even

Lining Style:

Segment plain

Arc Length:

Between 3.440 inches and 3.560 inches

Minor Radius:

3.500 inches

Application Type:

Dry

Hole Type And Quantity:

4 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side grooved

Attachment Method:

Bolted

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 71871 have indicated their part number contained asbestos prior to 1984. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
