Integral Valve Operation Method:

Hydraulic

Design Characteristics:

Double acting single cylinder

First Piston Rod End Style:

External threaded

Piston Rod End Similarity:

Not identical

Second Piston Rod End Style:

External threaded

Port Location And Quantity:

2 center section

Special Features:

Rated capacity-advance 16 ton, retract 9.5 ton

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A34200
