Body Diameter:

0.625 inches

End Application:

B-1b aircraft

Body Construction:

Tubular

Special Features:

Supp features: one end double bearing, second end clevis; tube wall thickness 0.049 in.; ultimate load capacity, tension 3560 lbs., compression 2350 lbs.

Material (non-core):

Aluminum alloy, ww-t-700/3

Material:

Aluminum alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A52410
