Overall Length:

96.000 inches

Core Material:

Steel, stainless

Core Diameter:

0.250 inches

End Connection Type:

Plain ferrule both ends

Casing Material:

Plastic

Bearing Type:

Ball both ends

Torsional Deflection Rating:

10.0 degrees per in.-lb winding and 13.0 degrees per in.-lb unwinding

Casing Length Between Ferrules:

91.000 inches

Enddiameter:

0.625 inches both ends

Core Rotation Direction:

Clockwise

Minimum Operating Radius:

6.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T246-e
