Cross Sectional Shape:

Beveled top, straight face, scraper

Ring Style:

Concentric

Radial Wall Thickness:

3.0000 inches

Overall Width:

3.0000 inches

Standard Bore Diameter:

1.877 inches

End Application:

Seawolf class submarine

Oil Passage Type And Quantity:

1 groove vertically through ring

Special Features:

Internal groove 2.246 in. Dia., 0.429 in. Wd, located 0.718 in. From end, four 0.860 in. Diameter through holes located 0.937 in. Center distance from second end, used on snorkel induction mast hydraulic head valve assembly

Material:

Nickel and copper and aluminum alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
