Overall Length:

8.500 inches

Body Width:

Between 3.985 inches and 4.000 inches

Body Thickness:

2.630 inches

End Application:

Stream (std. Tensioned replenishment at sea method)

Body Construction:

Solid

Special Features:

Clevis first end w/0.563 in. Diameter hole; second end w/single 0.943 diameter hole rotated 90.0 degrees from first end; used as a chain adapter on aoe-3 and -4 assembly

Material (non-core):

Steel, aisi 4140 or steel, sae 4140

Material:

Steel

Surface Treatment (non-core):

Painted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A524I0
