Linear Actuating Cylinder Assembly - Page 1 of 1

View Online at <https://aerobasegroup.com/nsn/3040-01-474-6404>

Body Material:

Steel

Integral Valve Operation Method:

Hydraulic

Design Characteristics:

Single acting single cylinder

Special Features:

Viton seals; hydrostatic test pressure is 4500 psi; metal port and vent plugs; special taper cushions; total cylinder weight equals 49 lbs; hydraulic cylinder is 2h series & style "f/h" mounting. It has a bore size of 1.50, a rod diameter of 5/8, a stroke of 82.000 and cushions at both ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A34200
