Width:

3.000 inches

Overall Length:

17.902 inches

Bore Inside Diameter:

Between 1.516 inches and 1.518 inches

Product Name:

Arm weldment, main shaft (fwd)

Special Features:

Item consists of sleeve p/n 7009484-3 welded to plate p/n 7009484-2; sleeve bore diameter 2.005 in min/2.009 in maximum with keyway 0.506 in min/0.511 in maximum x 3.000 in long x 0.219 in min/0.223 in deep, od is 3.000 in, two tapped holes in sleeve 0.375-16unc-3b; item shall have ti-dize type iv coating applied; weight 10.56 pounds.

Material:

Titanium

Material Specification:

Astm b265 assn standard 1st material response and astm b348 titanium 5111, grade 32 assn standard 2nd material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
