End Application:

Qec assembly, aircraft c-130

Criticality Code Justification:

Agav

Product Name:

Adapter, pulley fan

Special Features:

751 bore with .060 slot; od is 3.44 inches; tapered shoulder, taper to be .750 in/ft on the od; flange has 4 x 0.358 through holes; also has 2 x 0.312-18 unc thru; flange is .44 inch wide; finish is black zinc electroplate per astm b633, sc3 (.5 mils), type ii or equal;

Material:

Iron

Material Specification:

A439, type d2 assn standard all material responses

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A523y0
