End Application:

Remote operator system

Core Material:

Steel, corrosion resisting

Core Diameter:

0.6250 inches

Casing Material:

Steel, corrosion resisting

Casing Length Between Ferrules:

215.750 inches

Casing Protective Device Type:

Flexible steel hose protector

Corelength:

216.180 inches

Special Features:

Description: .625 flexible shaft assembly, uniflex, length (l) is 218 in. Or 18'2": core length calculation used l-1.820; for casing length l-2.250; drill through and ream for roll pin at assembly with mating parts; bronze sleeve and viton o-rings; all else sst

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T246-e
