Flexible Shaft Assembly - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3040-01-491-5727

## **End Application:**

Remote operator system

#### **Core Material:**

Steel, corrosion resisting

# Core Diameter:

0.6250 inches

#### Casing Material:

Steel, corrosion resisting

#### **Casing Length Between Ferrules:**

339.750 inches

#### **Casing Protective Device Type:**

Flexible steel hose protector

#### Corelength:

340.180 inches

#### **Special Features:**

Description: .625 flexible shaft assembly, uniflex, length (I) is 342 in. Or 28'6": core length calculation used I-1.820; for casing length

I-2.250; drill through and ream for roll pin at assembly with mating parts; bronze sleeve and viton o-rings; all else sst
