Overall Length:

7.625 inches

Body Width:

1.500 inches

Body Thickness:

0.3750 inches

End Application:

Oliver perry class ffg; nha wtqa door

Link Style:

Straight

Body Construction:

Solid

Product Name:

Toggle link assembly lh

Special Features:

Item consists of pc's 152 and 153 welded together, 1st end, two pc's welded together and is 0.625 in. Thick with one hole drilled and reamed 0.9355-0.9365 in. Diameter 0.750 in. From end on center; second end hole drilled and reamed 0.499-0.500 in. Diameter 0.750 in. From end on center; crescent shaped cut out 3.1875 in. From second end on center with a 2 in. Radius cut to a depth of 0.750 in. Similar to item 150 and 151 nsn 3040-01-493-8720 and nsn 3040-01-470-1672.

Material:

Stainless steel

Material Specification:

Astm a-276 type 316, cond a, hr and descaled assn standard 1st material response and qq-s-763d type 316 cond a, cold drawn federal specification 2nd material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A52410
