**End Application:**

Clutch assembly a3, anchor drive, nssn class submarine.

**Product Name:**

Yoke, clutch

**Special Features:**

Lever arm length is 28.870, width is 8.385 at forked location at pivot holes, thickness is 1.500. Connects to the clutch jaw and shaft.

**Material:**

Copper alloy

**Material Specification:**

Qq-c-390 national specification all material responses

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A524p0
